

Be in control

Quality Management and Continuous Improvement

BE IN CONTROL

Issues

To succeed in a global and competitive market, companies must rely on a strict quality system. The costs generated by non-quality represent a significant impact on the continuity of the company activities. Interruption of production, recall of defective products, and impact on the reputation are among these possible impacts and costs.

Therefore, Quality and Continuous Improvement Management are key factors in business maintenance and development. IsoVision Management System offers an integrated suite of modules to implement a new standard and control all of your business processes.

And most importantly, IsoVision gives you full control over ongoing actions within the company, thereby giving you a high-quality tool to improve your competitiveness.

Modules

-  Risk Analysis
-  Planning
-  Document Management
-  Training & Skills
-  E-Learning
-  Audits & Inspections
-  Equipment Maintenance
-  Supplier Management
-  Monitoring & Measuring
-  Nonconformities & CAPA
-  Dashboard
-  Performance Review

Benefits

- Structure and speed up ISO 9001 and AS 9100 implementation
- Decrease the daily management of quality systems (supports up to 20 standards in an integrated way: ISO 9001-14001-22000, AS 9100, OHSAS 18001...)
- Reduce the burden of document management related to your quality system
- Speed up project and action monitoring through dashboard and automatic emails
- Structure the work of those responsible for implementing a quality standard
- Eliminate the use of many paper forms and reports
- Integrate Quality, Health, Safety and Environment in a single management system
- Eliminate costly internal development and implementation delays

... In order to more effectively manage our ISO 9001 - ISO 14001 – OHSAS 18001 programs, we decided to turn to the software solution that seemed the most suited to our needs and in line with the achievement of our performance targets. IsoVision helped us to successfully achieve in one year our certification process and integration of these standards ...

- Bilingual system and support (English-French)
- Purchase by module or section (Quality, Environment, Health & Safety)
- Built-in Key Performance Indicators (KPI) for Quality Management
- Customizable screens and reports
- Complete support (installation, training, ISO 9001 & AS 9100 consultation)

Health & Safety

CONTROL THE RISK OF ACCIDENT AND INCIDENT

Issues

Issues in Health & Safety (H&S) at work are numerous and unforeseen events (accident, incident, illness, death) results in significant costs for businesses. The establishment of a risk management program is an excellent way for meeting this challenge.

However, many of these systems are crumbling under their own weight, causing redundant documents and follow ups. IsoVision provides management with structured and efficient tools allowing staying in control over processes, objectives and documentation.

Most importantly, IsoVision is the best management tool for risk analysis and decision making based on structured information and real time key performance indicators (KPI).

Modules

-  Risk Analysis
-  Planning
-  Document Management
-  Training & Skills
-  E-Learning
-  Audits & Inspections
-  Supplier Management
-  Nonconformities & CAPA
-  Dashboard
-  Performance Review

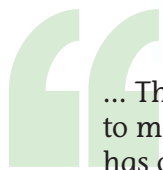

Benefits

- Structure and speed up OHSAS 18001 and ILO-OSH 2001 implementation
- Reduce the burden of document management of your H&S System
- Speed up project and action monitoring through dashboard and automatic emails
- Eliminate the use of many paper forms and reports
- Integrate H&S, Environment and Quality in a single management system
- Eliminate costly internal development and implementation delays

Features

- Purchase by module or section (Environment, Quality, Health & Safety)
- Built-in Key Performance Indicators (KPI) for H&S Management
- Customizable screens and reports
- Complete support (installation, training, implementation)

... The Belgo AbitibiConsolidated Company of Canada was the first division of the Corporation to move towards the certification of its Health & Safety system to OHSAS 18001. The Division has obtained OHSAS 18001 certification along with praises for its system of managing health & safety and its implementation. It is with this conviction that I recommend IsoVision services and their software to anyone willing to engage in a similar accreditation process ...

AbitibiBowater.

Environmental Management

REDUCE YOUR ECOLOGICAL FOOTPRINT

Issues

Respect of the environment is among the major challenges that companies are facing today. These challenges are significant and multiple. The evidence is well established that implementing an environmental management system (EMS) is an excellent way to meet this challenge.

IsoVision allows environmental managers to quickly identify, analyze and update tasks pertaining to environmental compliance, significant aspects and everything relevant to legal affairs.

IsoVision System manages all the information related to the aspects, impacts, laws, requirements, objectives, targets, programs and documents.

IsoVision optimizes the performance of your EMS so that it becomes an effective tool for sustainable development at your organization's service.
